Dear Tett,

Enclosed please find photos of a coin you may be interested in. It is an example of the 1797 Cohen 1 variety overstruck on a Talbot, Allum, and Lee token. This, by itself, is of no great significance, as most of this variety comes that way. However, you will notice that the coin is somewhat out of round, particularly at 6 to 8 o'clock on the obverse and on the corresponding section of the reverse. The thing that makes this piece significant is that some of the edge lettering of the original TAL token is still visible, in particular the letters HE and ST (Payable at the store of). If this is the sort of curious half cent with a story that you are looking for, the price is \$475. *VG 7*

I also have a 1793 C-3 variety with some planchet laminations, the most significant being a small area missing from Liberty's chin. Unfortunately, I was unable to photograph this piece in time to include it with the present packet, but if you are interested in it also, I will send it to you on approval. The coin grades a full Very Fine and the planchet (with the exception of the laminations) is superb. The price on this piece is \$2000. which is \$1000. below the current "BID" price for VF 1793's.

Have you been able to examine your 1796 half cents for die state information. I am still interested in determining which piece came first. Of course, the reverse is the only telling side. If, when you examine them, pay particular attention to the surfaces, the final C in America and the N in CENT. These both seem to have differences on either variety.

Enough for now. Please keep in touch and if I can help with any hole-filling, please let me know!

Sincerely,

Ron

P.S. You may keep the photographs

I picked up a couple of 1/2 1¢'s you might like.
According to my records the G-2, 1825 1/2¢ we

Also, the error might interest you.
